Perfection

in detail...

The small and refined **trivum factory** lies at the heart of Stuttgart and continues to uphold the long tradition of “**Swabian inventive talent**” with extraordinary passion and creativity. This passion can be sensed and experienced in every detail of our product...

For more than 10 years now, we have developed and created impressive **Smart Multiroom** products with a unique combination of quality and individuality.

Thanks to consistently focussing on our core strengths we have achieved a remarkable level of integration with third party products and with the latest residential control technologies.

Our highly qualified and motivated team distinguish themselves by their drive for perfection and claim with pride that “**We don’t stop until it’s perfect**”. This promise provides a trusted foundation for our trading partners and guarantees an impressive level of customer satisfaction.

For this reason, we will always do justice to our own claim – to be the perfect **Multiroom System** for the most discerning customers.

On behalf of the whole **trivum** team, I look forward to convincing you too of the quality and perfection of our **Smart Multiroom** products.

Achim Schlumpberger
Founder and Managing Director

smart multiroom for the most demanding requirements...

You just want to listen to music.
You just want personalized lighting.
You just want to watch television or only a DVD?

Despite all the elaborate TV's,
projection screens, light sources
and cinema technology.

In short, your home offers all requirements to achieve your vision of a **Smart Home**.

At this point, the **trivum Multiroom System** offers you the highest degree of functionality and quality, paired with intelligent controls, which will inspire you.

trivum in the living room

In general, there are various audio and video devices in the living room. These individual products can be easily integrated into the **Multiroom System** from **trivum**.

trivum in the bedroom

Important functions such as the alarm or TV are considered standard in upmarket bedroom solutions. Convenient operation is possible using the **trivum Touch-Pad** or your iPhone / iPad.

trivum in the kitchen

Multifunctional and convenient controls, as well as being simple to clean plays an essential roll – and all this with sound quality that you have never experienced before in your kitchen.

trivum in the bathroom

Whether you are in the bath, in the sauna or in a spa with whirlpool, an important detail in the house's equipment is the hidden **Multi-room System** from **trivum**.

The trivum controls

simple, intuitive...

Music, lights, home automation and video – everything must be easy to operate so that it is used willingly and often.

Cooking, watching television or having a BBQ in the garden – we believe that various controls are optimal in different situations. For this reason, we have developed reliable wall mount Touch-Panels, remote controls that can be operated blindfold and Apps for your existing iPhone or iPad.

The whole flexibility of the **trivum Multiroom System** is made more accessible through an intuitive and pleasant operating concept. This accounts for the sophistication of **trivum** – since, for us, this simplicity of use dominates.

trivum TouchPad

The trivum hardware components

top quality, made-to-measure and logically thought through...

We set the highest standards when developing **trivum** hardware components.

Sturdy, easy to install, long-lasting and extendable, easy to maintain and energy efficient, as well as Impressive in its formal appearance, these are the baseline characteristics of **trivum** hardware components.

In order to achieve the required flexibility, the **trivum Controller** has a scalable modular design. It adapts to rooms and sources individually using different plug-in cards.

The powerful **trivum Amplifiers** can also drive demanding high-end loudspeakers. By using multiple controllers, even extremely lavish mansions or a modern apartment can be easily controlled and filled with sound.

trivum have developed flexible **RS232-** and **Infrared Adapters** to control devices such as a DVD player, TV sets or a screen.

trivum C4 Controller

Automation & Integration

KNX / EIB

For many years, **trivum** have supported the worldwide standard KNX for house automation.

The **trivum Multiroom System** offers quite specific added value for those customers who have fitted KNX / EIB for their light control. Thanks to **trivum**, existing KNX light switches, intelligent room controllers or wall panels with visualisation (1) can be used without an additional operating device to control the music, TV or cinema.

If the modern, capacitive **trivum TouchPad**, with its unique ease of use, is used in a room, then you can dispense with any additional light switch altogether. Every **TouchPad** is itself an intelligent KNX switch with the possibility to control lights, blinds, lighting effects and temperature.

Thanks to **trivum**, the possibilities for your **Smart Home** are extended significantly.

(1) e.g. Gira Homeserver, Jung FAP, EisBär

Device control extremely simple...

Television, DVD player, projection screen and surround receiver are all devices that were not originally designed to work together. To watch a film means that the television, DVD player, screen and surround receiver have to be switched on, switched over and set-up.

The **trivum Multiroom System** controls these devices and, for example, reduces handling to the push of one "TV", "DVD" or "music" key.

Control of the devices is undertaken by the **trivum RS232-** or the **Infrared Adapter**. All the complexities are reduced to a minimum through intelligent linking of the devices in the **trivum Control Software**.

For those houses using systems such as Crestron or AMX or where integration devices require an even closer connection to the **trivum Multiroom System**, we offer an interface based on **XML** standards. This allows developers total access to all functions and data of the **trivum Multiroom System**.

Service

perfect from A to Z...

Consulting, planning and installation of the **trivum Multiroom System** is only entrusted to selected experts, specially trained by us. In this way, we can be certain that your system will be perfectly tailored to your personal wishes and will operate reliably at all times. Your local **trivum partner** accompanies you from the first conceptual idea, ties up the whole entertainment package, arranges the cabling and installation schedule with your architect and the trades, configures the system and,

of course, explains all its features to you. Even after years your local **trivum partner** is available for all questions and requests relating to your individual **Multiroom System**.

Worldwide

trivum knows no boundaries...

trivum is established internationally and represented throughout the world at trade fairs. The concept of a **Smart Multiroom** has been re-defined by **trivum** and translated into a unique and impressive consequence.

Thanks to these persistent developments and the demand that is a result from this, **trivum** is represented internationally by trained and qualified partners.

The worldwide potential of **Multiroom** and **Automation** is just beginning to become apparent. Together with our partners, we are well prepared for the upcoming tasks from the markets.
